Guindy, Chennai

EXECUTIVE SUMMARY

Confident and dedicated individual with a solid grasp of computer science fundamentals like data structures, algorithms, and object-oriented design. Skilled in Java, C++, and Python, with a passion for solving real-world problems through clean, efficient code. Known for being a quick learner, detail-oriented, and hardworking, I thrive in collaborative, fast-paced environments and am always eager to grow and make a meaningful impact.

EDUCATION

UNIVERSITY OF MADRAS, GUINDY, CHENNAI.

Master of Computer Applications(MCA) - **8.8 CGPA(CURRENT)**

2024-2026

HOLY CROSS COLLEGE, TRICHY.

Bachelor of Science in Mathematics - **7.2 CGPA**

2019-2022

CERTIFICATIONS & SIMULATIONS

- Deloitte Australia – Data Analytics Virtual Job Simulation (Forge, April 2025)
- Microsoft – Azure SQL for Beginners (Coursera)
- IBM – Introduction to Big Data, Hadoop, and Its Ecosystem
- IBM – SQL and Relational Databases 101
- IBM – Java Fundamentals

SKILL

- Backend Development:** Java, JDBC, Servlets, JSP,, CRUD Operations, Backend Architecture
- Programming & Scripting:** Java, Python, C++, JavaScript, SQL
- Databases:** MySQL
- Machine Learning & Image Processing:** U-Net, OpenCV, NumPy, Pandas, Jupyter Notebook
- Tools & Platforms:** Eclipse, VS Code
- Other Skills:** OOP, Debugging, Problem Solving, Version Control, HTML, CSS (Basic)

ACADEMIC PROJECTS

Mini - Project: Supply Chain Management System

Nov 2024 - Dec 2024

- Aim:** To develop a web-based application that efficiently manages supplier and product data using CRUD operations.
- Tools/Tech Used:** Java, JDBC, Servlets, MySQL, JSP
- Outcomes:** Improved data management efficiency and reinforced skills in backend development and database connectivity.

Project: AI-Based Fire Detection System

Jan 2025 - April 2025

- Aim:** To build an AI model capable of detecting and segmenting fire regions in images extracted from video frames for real-time monitoring.
- Tools/Tech Used:** Python, U-Net, OpenCV, NumPy, Jupyter Notebook
- Outcomes:** Achieved accurate fire segmentation, enhanced understanding of deep learning models, and real-time image analysis.
